

Objectives:

- Green Micro Pathways will provide a micro-credential green skills framework approved by experts from industry, education and training, which can facilitate adults to reskill/upskill within a lifelong learning paradigm to improve employment opportunities.
- The project consortium which include partners from industry, universities, adult education, VET, and agencies will provide a multilevel perspective to co-create the micro-credential framework, platform, teaching and learning resources to support low skilled adults gain recognised micro-credentials for upskilling/reskilling.
- The Green Micro Pathways project team benchmarked adult education policy in the six consortium countries (Sweden, Ireland, Bulgaria, Spain, N. Macedonia, Latvia) and explored emerging green skills to ensure that learning outcomes are linked to the micro-credentials framework.
- A digital learning platform aligned to the European Qualifications Framework Level 4 requirements is being developed. The project will pilot and test the outcomes in order to develop learning material for teachers/trainers to be used in the training of low-skilled adults.

Project: Green Micro Credentials pathways: Upskill and Reskilling Low Skilled Adults for Lifelong Learning (Project No. 101087539)

GreenMICRED Pathways

Progress in 2024

On September 26 and 27, 2024, a partnership meeting was held with participants from all partners in Riga, Latvia. In addition to reviewing the work packages for the activities, the next steps of the project were also discussed.

In the period from October 14 to 18, 2024, as part of the Erasmus days initiative, various trainings for trainers will be held in Sofia, Bulgaria. All partners will send their representatives to the event.

What's coming up?

In 2025, 6 mobilities will be held in all partner countries for the successful completion of the project.
